Organizational Resiliency

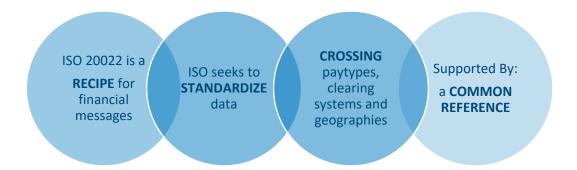

Why Automate?

Automation Solutions

| Communications/ Connectivity | Payables | Receivables | Reconciliation |
|---------------------------------|----------------------------------|---|----------------------------------|
| APIs | Consolidated Payables | Consolidated Receivables | Account Information APIs |
| File Transmission | File Based: ACH, Virtual Card | Web Payment Portal | Electronic Bank Statements |
| Online Banking Uploads | Manual Online Banking Payments | Lockbox Processing with Cash Application | Returns and Rejects Reporting |
| Manual Entry | Checks | Received ACH Credits | Online Banking Reporting |

What is ISO 20022 and Why is it Important?

ISO 20022 defines financial messages for many business areas

• Relevant examples for Treasury include:

Pre-Automation Homework

- ✓ Identify your automation opportunity and how you will measure success
- ✓ What can my current or target system do?
- ✓ What is considered "standard"?
- ✓ How many systems are in scope?
- ✓ Am I addressing a single process for all entities or all processes for a single entity?
- ✓ Are the necessary resources available?
- ✓ Define Timelines, Deadlines and Project Plans
- ✓ How much will it cost?

Automation in Action

Every company takes a similar journey

Determine what your system can do

Make a plan and socialize it

Remove paper

Data cleanup required

Test, test, test!

Identify and remove bugs

Share the wealth within your organization

Q&A Session
