With more than 16 years of service, our existing controller is beginning a succession and we need to identify and hire her successor. Our plan is simple – find someone to come into the business, benefit from their experience and knowledge and have a well-planned, smooth transition. This plan is another example of what we mean when we say we are family friendly.

The successful person to join our organization will:

- Work as key leader in our multi-company environment;
- Support the organization through independent judgment, interpretation and initiative in the areas of planning, administration and management of the organization's financial and operational risks;
- Influences daily, monthly and annual financials, budgeting and accounting functions;
- Ensure compliance with ethical standards in accordance with generally applicable accounting principles in conjunction of applicable state and federal regulations;
- Functions as the Secretary-Treasurer for the organization; and
- Improve operational reporting before issues develop.

The role will report to the owners and be an integral resource to other leaders in the organization. The successful person will have a small staff, but not see any type of work as “below them.” Our preferred candidates will have 5 to 7 years of related experience, with a minimum of a Bachelor’s Degree in accounting; or equivalent combination of education and experience.
